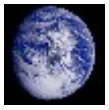
The Planets

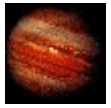
Mercury
Diameter: 4879 km
Distance from Sun: 57.9 million km
Length of Day: 175.94 days Orbital Period: 88 days
Gravity: 0.378 that of Earth

Venus
Diameter: 12,104 km
Distance from Sun: 108.2 million km
Length of Day: 116.75 days Orbital Period: 224.7 days
Gravity: 0.907 that of Earth



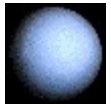
Earth
Diameter: 12,756 km
Distance from Sun: 149.6 million km
Length of Day: 24 hours Orbital Period: 365..2 days
Gravity: 1

Mars
Diameter: 6792 km
Distance from Sun: 227.9 million km
Length of Day: 24.7 hours Orbital Period: 687 days
Gravity: 0.377 that of Earth



Jupiter
Diameter: 142,984 km
Distance from Sun: 778.6 million km
Length of Day: 9.9 hours Orbital Period: 4331 days
Gravity: 2.36 that of Earth

Saturn
Diameter: 120,536
Distance from Sun: 1433.5 million km
Length of Day: 10.7 hours Orbital Period: 10,747 days
Gravity: 0.916 that of Earth



Uranus
Diameter: 51,118
Distance from Sun: 2872.5 million km
Length of Day: 17.2 hours Orbital Period: 30,589 days
Gravity: 0.889 that of Earth

Neptune
Diameter: 49,528
Distance from Sun: 4495.1 million km
Length of Day: 16.1 hours Orbital Period: 59,800 days
Gravity: 1.12 that of Earth

Source: Dr. David R. Williams, NASA
Note: Days refers to Earth days.
